Project v1.4

CS2901 Software Engineering I

1 Summary of Submissions

Submission	Minimum acceptable performance to consider as 'reached'
Product Release	Follow Section 2
Code Quality report	Follow Section 4
Updated User Guide	Explained in previous assignments
Updated Developer Guide	Explained in previous assignments

1.1 Deadlines

1.1.1 Demo 1.4. Presentation: Monday, 10th June

You shoud consider into your presentation:

- Demo

1.1.2 Submission Date: Tuesday, 11th June

The deadline for submiting all items in above Table is the midnight before Tuesday 11th June.

2 Product Release

Do a proper product release as follow:

1. Update the version number in MainApp.java.

2. Generate a JAR file using Gradle. Ensure that the jar file works as expected by doing some manual testing.

3. Tag the repo with the version number. e.g. v1.4

4. Create a new release using GitHub and upload the JAR file you created. For more information, please follow this link

3 Demo

1. Do a quick demo of the main features using the code submitted in section above. Objective: **demonstrate that the code works**.

4   Code Quality

1. Present a report using Sonar to ensure your code quality in v1.4. **demonstrate that the code works**.
